

Pozicija elemenata armature za kupaonske kade • Positioning of bathtub fitting elements

Na većinu modela kupaonskih kada moguće je, po želji, tvornički ugraditi i armaturu koja se sastoji od miješalice, tuša i izljeva. U nastavku provjerite moguće pozicije tvorničkih elemenata armature.

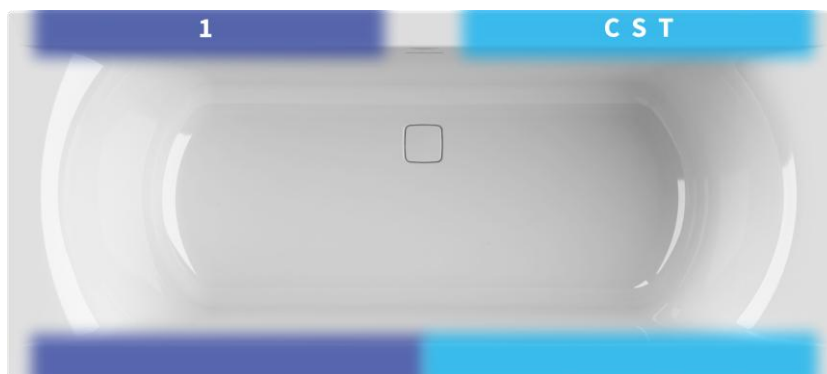

Svijetloplavom bojom označene su pozicije za miješalicu i tuš, a **tamnoplavom** pozicije za izljev. Pozicije miješalice s tušem i izljeva moguće je obrnuti.

For most bathtub models it is possible to request factory-installed fittings consisting of a mixer, a shower, and a spout. Below you can check the positioning options for the factory-installed fittings.

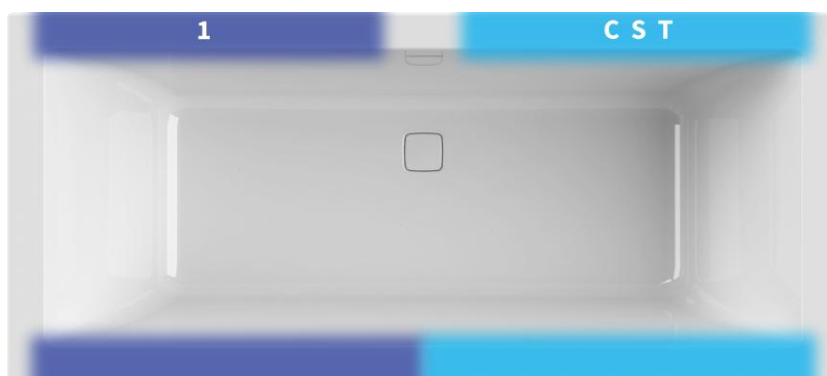

*Mixer and shower positions are marked in **light blue**, and spout positions are marked in **dark blue**. The positions of mixer with shower and spout are interchangeable.*
